MADE IN INDIA

PREMIUM BATH FITTINGS

At **Superior Bath Fittings**, our passion flows through every curve, every valve, and every drop of water. We're not just in the business of faucets we're in the business of enhancing your everyday experiences. Here's why we stand out,

Our Legacy and Commitment

- With a legacy spanning decades, we've been dedicated to creating superior bath fittings that blend form, function, and aesthetics.
- Our commitment to excellence drives us to innovate, design, and manufacture faucets that elevate your spaces.

Craftsmanship and Precision

- Our artisans in Jamnagar, Gujarat meticulously craft each faucet. From the initial design to the final polish, their skilled hands ensure perfection.
- We combine traditional craftsmanship with modern technology, resulting in faucets that are both timeless and efficient.

Materials Matter

- We believe in quality materials. Our faucets are forged from premium brass, ensuring durability, corrosion resistance, and longevity.
- Every curve, every handle, and every spout reflects our dedication to using the finest materials.

Global Reach

- Our manufacturing hub in Jamnagar is a testament to our commitment to excellence. Here, more than 50,000 faucets come to life each month.
- Our products reach discerning customers, designers, and architects across India and beyond.

Quality Assurance

- Before a **Superior** faucet graces your home, it undergoes rigorous testing. We check for leaks, smooth operation, and flawless finishes.
- Our faucets aren't just beautiful; they're reliable companions for years to come.

Join Our Flow

- At **Superior Bath Fittings**, we invite you to experience the flow of passion, precision, and elegance. Let our faucets transform your spaces, one drop at a time.

Journey of Brass Faucets

1. RAW MATERIAL

Brass is an alloy of copper and zinc that is popularly used for manufacturing faucets because of its property to be resistant to corrosion and hard-water calcification. The components of a faucet can be made up of metals other than copper and zinc. These are received as finished components from other manufacturers.

2. CASTING & MOLDING

The main body of the faucet is obtained either through die-casting or its shape is cut out from high-quality brass rods. In die-casting, brass is melted at high temperatures, approx. 1150°C and is poured into moulds of the desired shape.

3. MACHINING

The main body of the faucet is obtained either through die-casting or its shape is cut out from high-quality brass rods. In die-casting, brass is melted at high temperatures, approx. 1150°C and is poured into molds of the desired shape.

4. POLISHING

This process is essential to achieve precise surface finishing. To obtain a high-quality product that exudes a shine, the brass surface is polished to technical precision. This is a combination of manual and machine-driven processes. Once the polishing is done, only then can the product be sent for chrome plating.

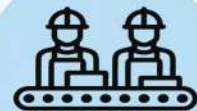

5. ELECTRO-PLATING

In this process, first, a base coating of electroplated Nickel is applied to the product. After that, a thin coating of electroplated chromium is applied. The chromium layer makes it durable and corrosion-resistant. After plating, the faucet is installed with various components which is a computerized process. The faucet and the components are stored for a while so that they are set before being sent to the assembly and fitment.

6. ASSEMBLING

The assembly can involve both manual and automated processes. This process takes place on rotary assembly machines which are precisely controlled. The nozzle, if separate, is installed first. Cartridge and control levers are installed after the nozzle.

7. TESTING

The created faucets are then tested rigorously on both water and compressed air. Samples are tested for critical dimensions and durability. Faucets are also required to pass several environmental regulations.

8. DELIVER

The final process in the production of faucets is transportation. After the manufactured faucets pass all the trials, they are sent out into the market.
